REPORT

No. 9.

Report of the Director of the Mint.

MINT OF THE UNITED STATES, Philadelphia, November 9, 1858.

SIR: I have the honor to present the following report of the operations of the Mint and its branches, including the assay office, for the

year ending June 30, 1858.

The deposits received and coinage executed at the principal mint during the year, that is to say, from the 1st July, 1857, to the 30th of June, 1858, inclusive, were as follows: gold deposits \$9,876,842 30, gold coins struck, \$10,200,788 50; fine gold bars, \$21,088 10; silver deposits and purchases, including silver parted from California gold, and amount received in exchange for cents of the new issues, \$3,337,541 58; silver coins executed, \$4,970,980; silver bars, \$843 37; cents coined, \$234,000; total deposits of gold and silver, \$13,214,383 88; total coinage, \$15,427,699 97. The coinage was comprised in 44,833,766 pieces.

The deposits received at the branch mint at New Orleans amounted to \$4,455,460 54; of which the sum of \$1,148,793 33, was in gold, and \$3,306,667 21, in silver. The coinage amounted to \$1,315,000 in gold, and \$2,942,000 in silver; total coinage \$4,257,000, comprised

in 10,226,000 pieces.

The branch mint at San Francisco received gold deposits to the amount of \$19,123,111 28, and silver, the sum of \$193,388 24. The coinage operations were as follows: gold coin, \$18,459,800, unparted gold bars, \$816,295 65; silver coins, \$127,750; silver bars, \$19,752 61; total coinage, \$19,423,598 26; comprised in 1,362,028 pieces.

The deposits at the branch mint at Dahlonega amounted to \$95,614 58; the coinage, \$100,167; the number of pieces struck was

21,793.

At the branch mint at Charlotte, the sum of \$176,067 49 was deposited for coinage; the coinage, comprised in 40,122 pieces, amounted to \$177,970.

The operations of the two last named institutions are confined to

gold.

The assay office at New York received, during the year, the sum of \$21,073,882 31 in gold bullion, and \$2,362,357 64, in silver; the number of fine gold bars stamped at this office was 7,052, of the aggregate value of \$21,798,691 04; silver bars, 894, of the value of \$171,961 79.

The entire amount of bullion received at the several minting estab-

lishments during the year were as follows:

 Gold
 \$51,494,311
 29

 Silver
 9,199,954
 67

The coinage operations during	the same per	riod, wei	re as follows	:
Gold, number of pieces	2,085,755	value	\$52,889,800	29
Silver, number of pieces	31,005,900	value	8,233,287	77
Cents, number of pieces	23,400,000	value	234,000	00
			-	
Total number of pieces	56,491,655		61,357,088	06

The total deposits received at all the mints, as above stated, amount to \$60,694,265 96; in this sum, however, are embraced the re-deposits at the different institutions. Deducting these re-deposits, the actual amount of the precious metals brought to the mint and its branches during the period embraced in this report was \$49,821,501 87.

The amount of gold of domestic production deposited during the year was \$40,977,168 55; derived as follows: from California, \$40,591,140 88; from Oregon, \$9,181; and from the Atlantic States,

\$376,846 67.

The deposits of Spanish and Mexican fractions of the dollar at the principal mint, the branch mint at New Orleans, and the assay office at New York, from the passage of the act of February 21, 1857, entitled "An act relating to foreign coins and to the coinage of cents at the Mint of the United States," to the 30th of June, 1858, have amounted to \$1,072,434; of this amount the sum of \$293,246 was deposited at the principal mint for exchange for cents coined under the act above cited.

The amount transferred to the Treasury of the United States from the mint and its branches on account of the charge on gold coinage of the half of one per cent. and of the profits on the coinage of silver are as follows: Gold coinage charge, \$148,674 59; profits on silver purchases, \$120,791 32. If we add the balance which stands to the credit of the cent coinage account, which may be stated at \$50,000, it will be seen that the amount paid, or transferable, into the Treasury of the United States from the Mint and its branches for the period embraced in this report is \$319,465 91. The act of Congress approved February 21, 1853, which authorized a deduction of the one half of one per cent. from depositors of gold, as a coinage charge, applied "in all cases, whether the gold deposited be coined or cast into bars or ingots;" but a subsequent law, section 7, act of March 3, 1853, relieved deposits paid in bars from this charge, and made it applicable to coin only. The amount in value of fine gold bars paid out to depositors during the year was \$14,070,330 72. If the charge above stated had been imposed upon the depositors of this bullion, it would have yielded \$70,351 65 to the Treasury of the United States. I think it is inexpedient to make this distinction in favor of bars; and I therefore beg to repeat the suggestion contained in my last report, namely, that the law in question be so altered as to restore the former act, and thus authorize the charge to be made to depositors of bullion, whether they are paid in fine bars or in coin.

The third section of the act of Congress approved February 21, 1857, makes it my duty to cause assays to be made, from time to time, of such foreign coins as may be known to our commerce, to determine

their average weight, fincness, and value, and to present a statement thereof in my annual report. In my last report I embraced a very full and particular statement on this subject. Since then we have made many assays of the more important varieties of foreign coins, and such as enter into our commerce, but I have nothing material to add to the facts set forth in that statement, except so far as it presents the present values of foreign silver coins. These values have been materially changed, in consequence of the reduction of the mint price of silver. This reduction has become necessary, because the supply of silver coins in several of the Atlantic cities is too abundant, especially in such of them as permit the circulation of bank notes of a less denomination than five dollars. The price per ounce, of standard fineness, has been reduced from $122\frac{1}{2}$ to 121 cents. I have therefore caused tables of weight, fineness, and value to be constructed conformable to the latter rate, and have attached them to this report.

Within the last year some new varieties of bullion have been brought to our notice. The gold of the Frazer river region, of which, however, but little has reached us, is one of these varieties. It is found to be considerably alloyed with silver—more so than the average of California gold. With our present scanty knowledge we cannot rate it higher than 840 thousandths fine, on the average, which, allowing

for the silver, would be \$17 50 per ounce, after melting.

or stony substance.

Another variety which has been brought to our attention is the gold from the Platte river, of which we have had but one sample. This was of high fineness, equal to that of Australia, and a little superior to that which was formerly received from Santa Fé, through the overland traders. The sample alluded to gave a fineness of 964 thousandths; equal to \$19 92 per ounce, after melting. A deduction of from two to four per cent. upon the values above stated will give a proximate valuation of native unmelted grains, free from the gangue

The Mint has lately received a deposit of Chinese stamped ingots of gold. They were sufficiently uniform in weight and fineness to induce the belief that they were intended to be of a definite value for the purposes of currency. In fact the gold and silver currency of China is always in stamped bars or ingots, and never in coined pieces, in the sense commonly understood in other parts of the world, except so far as Spanish and Mexican dollars are used, and these receive a Chinese stamp as they pass from one merchant to another. The gold ingots just mentioned were of the fineness of 966 thousandths, which probably is considered "sycee," or fine gold, in a commercial way, the value per ounce troy of which would be \$19 97. The average weight was eleven ounces eighty-hundredths (11.80) nearly, and the average value \$235 50, without the mint deduction for coinage. In Chinese language they were pieces of ten taels each, making the golden tael \$23 55. These particulars may be interesting to commercial men, and to the public, especially if it should be one of the effects of the recent treaty of our government with China to cause a current of gold in this direction, in payment for our manufactured exports. This was the first opportunity we have had of testing Chinese gold bars.

The production of silver from the mines of Lake Superior increases from year to year, but usually with the disadvantage of a large alloy with copper, so that the latter metal has to be sacrificed by the owner to render the silver available. The working of silver ores in other regions, however, has usually much greater difficulty and cost to contend with. Heretofore the yield of silver from Lake Superior was too inconsiderable to require a place in the statistical tables, but in view of the increased value of the deposits from thence during the last year, they will be found stated in this report, and will hereafter be

regularly noticed.

For various reasons, growing out of production and trade, we now receive more of the Mexican dollars than for some years past. And the removal of the restrictions which formerly prohibited the exportation, from that country, of silver bars and amalgams, has much increased the supply of silver bullion. Much of it finds its way from the Mexican States, through Matamoras, to New Orleans; and I have reason to believe that the supplies from that direction will continue to be large and regular. The growing abundance of silver currencythough it is by no means excessive, nor can be while so many small bank notes are freely circulated—seems to open two questions to our consideration, namely: 1. Whether some measure cannot be adopted by which bank notes under the denomination of twenty, or at least of ten dollars, may be withdrawn from circulation. 2. Whether it is not expedient to extend the limit to which the silver coinage is now restricted as a legal tender. I do not purpose to enter upon the discussion of either of these questions further than to make one or two observations. 1. It is now quite evident that gold and silver are supplied and produced in sufficient quantities to provide the country with money and change. 2. It is not intended, by the suggestion in reference to the silver coinage, to extend the limit so as to interfere with gold as the chief medium of payments; but only so far as to increase the usefulness of the silver coins. If the limit were extended to fifty, or even a hundred dollars, no inconvenience or injustice, it is believed, would be produced, but, on the contrary, many advantages would result from it.

In a former communication (November 4, 1857) I presented to your consideration some views upon the propriety of extending the benefits of a gold currency by authorizing the issuing of certificates on the deposit of gold bullion, and gold coins, at the mints; and of similar certificates on the deposit of gold coins at the Treasury and assistant treasuries of the United States. It seems appropriate that I should, in this report, call your attention to that part of the suggestion which relates to the issuing of mint certificates for deposits of gold bullion. The 19th section of the act supplementary to the act establishing the Mint, approved January 18, 1837, authorizes "the Treasurer to give to the depositor a certificate of the net amount of the deposit, to be paid in coins of the same species of bullion as that deposited." This section might, with great propriety, and with advantage to the public, be so altered as to permit the certificates for gold deposits to be issued in such sums as the depositor may desire, restricted to sums not less than fifty dollars, and made payable to the bearer on demand.

issuing of such certificates would induce a more general use of gold coins and their undoubted equivalent, and prepare the way for the expulsion of the paper money, which now, in violation of the Consti-

tution, and to the injury of the people, usurps their place.

The tabular statements attached to this report exhibit in detail the operations of the Mint and its branches for the last fiscal year, and for previous years. The following statistics are presented by these tables, viz: The deposits and coinage at the Mint and its branches, and the assay office, during the year ending June 30, 1858; the coinage operations of all the minting establishments of the United States, from their respective organizations to the 30th of June, 1858; the entire deposits of domestic gold at the mints and assay office for the same period; also the production, since January 1, 1841, of domestic silver, including amount parted from domestic gold; the amount of silver coined since the passage of the act approved February 21, 1853; the amount and denomination of fractions of the Spanish and Mexican dollar, and the cents of former issues, deposited at the Mint of the United States for the new cent; also the amount of fractions of the Spanish and Mexican dollar purchased since the passage of the act of February 21, 1857.

I have the honor to be, with great respect, your faithful servant,

JAMES ROSS SNOWDEN,

Director of the Mint.

Hon. Howell Cobb, Secretary of the Treasury.

A statement of foreign gold and silver coins, prepared by the Director of the Mint to accompany his annual report, in pursuance of the act of February 21, 1857.

EXPLANATORY REMARKS.

Only the principal denominations of coin in each country are set down, other sizes being proportional. When this is not the case, the deviation is stated.

The weight is given in the troy ounce, and decimal fractions thereof, without being carried out to an extreme. This method is preferable to the weight in grains for commercial uses,

and corresponds better with the terms of the Mint.

The valuation of gold is given in two columns. In the first is shown the value as compared with the legal content or amount of fine gold in our coin. In the second is shown the value as paid at the Mint after the uniform deduction of one-half of one per cent. The former is the value for any other purposes than recoinage, and especially for the purpose of comparison; the latter is the value in exchange for our coins at the Mint.

For the silver there is no fixed legal valuation. The law provides for a shifting of price according to the circumstances of demand and supply. At the moment of making this report, the price, which previously was 122½ cents per ounce of standard fineness, has been

reduced to 121 cents, at which rate the ensuing values are calculated.
